INTEX[®]
MILLWORK SOLUTIONS

*The finishing touch that
stands the test of time.*

Innovative Solutions

Low Maintenance

INTEX Cellular PVC products offer durability that far surpasses wood or other materials. Wood and composite materials are affected by moisture, changing temperatures, UV light, and insects, and warp, rot, swell, or split as a result. INTEX's Cellular PVC is just the opposite. Our products are impervious to the elements, and will remain in its original beautiful condition with minimal upkeep or maintenance.

Beautiful Design

INTEX Cellular PVC products have the beauty, customizability, and craftsmanship of traditional wood millwork. On top of unparalleled customizability, INTEX products can be easily *painted. Best of all, because cellular PVC does not absorb moisture, the paint creates a strong bond with the PVC that enables the paint to retain its fresh look that will never peel!

*INTEX recommends using a paint with a LRV greater than 55.

Reliability

INTEX Millwork Solutions is a family company who values trusted relationships with its partners and offers top-notch customer service with exceptional lead times, no matter how basic or complex the project. Builders, contractors, and architects enjoy the peace of mind that comes with a manufacturer they can trust for support from first inquiry through installation. INTEX will go above and beyond to ensure their partners are satisfied with their products and service.

Welcome to INTEX Millwork Solutions, where we are leveraging world-class engineering and design to develop inventive and beautiful architectural solutions for all of your projects, every time.

As one of the first companies to offer aluminum-reinforced, cellular PVC millwork, INTEX Millwork Solutions enables architects, builders, and contractors to anticipate and deliver on their customers' vision for their homes, no matter how grand. And our commitment to innovation

empowers builders, architects, and contractors to exceed customers' expectations with designs that are not only distinctly beautiful, but durable and reliable, too.

Beyond constructing intricately engineered products, INTEX Millwork Solutions provides each and every builder, contractor, and architect with the trusted solutions and support they need to be confident in the quality and craftsmanship of their work.

The finishing touch that stands the test of time.

HAMPTON

EXTRUDED RAIL SYSTEM

Why PVC and Aluminum are Superior

Works Like Wood

Rails can be cut, coped, milled, routed, or drilled just like wood. Full line of custom newel posts and caps are available to add a highly customized wood look to your project.

Paint Adheres Better to PVC

Paint adhesion on PVC is superior to wood. Paint must have a Light Reflective Value greater than 55. Paint brush strokes on Hampton rail make it indistinguishable from painted wood – a look that cannot be achieved with WFMEs. And in many cases, painting the WFME will void the warranty.

Problems with Wood Flour Composites

Because of the need to build structural integrity into an inherently weak product, most wood flour composites have closed tube construction incorporated into their rail design. Unfortunately these pockets can eventually fill with water and go through freeze/thaw cycles until saturation and cracking occurs, breaking down the product from the inside.

Cellular PVC Alternative

The Cellular PVC formulation used in the Hampton Extruded Rail System is proven material that has been used in the field for decades. This is combined with aluminum extrusion to provide structural integrity beyond what composites can offer.

HAMPTON

EXTRUDED RAIL SYSTEM

The Hampton Extruded Rail system is available in 6, 8 and 10 foot lengths for level & radius rail runs, and 6 & 8 foot lengths for stairway applications.

FOR INTEX RAILING SYSTEMS

Dress up your curb appeal by adding decorative panels to your selected INTEX Railing System. In addition to our standard designs, we offer a variety of custom options, and the option to design your own panels.

Radius Rail FOR INTEX RAIL SYSTEMS

INTEX can create radius rail arcs from 6', 8' and 10' rail spans. For stairway applications 6' and 8' spans are available. * INTEX guarantees the radius rail fit when the INTEX Radius Rail Template Kit is used.

INTEX Post Mounts

For longer spans INTEX can provide a post mount with a PVC cover to allow for a continuous top rail while providing structural support at mid span up to 16 feet. INTEX Post Mounts can replace a pressure treated 4x4 and work well with INTEX Newel Post Wraps.

Newel & Column Wraps

Wrapped in stylish designs, newels and columns can create dramatic visual elements. Homes adorned with columns and newels convey a feeling of timeless strength and beauty.

- Choose from standard offerings or create custom shapes and sizes including flat, raised, recessed, chamfered, fluted, tapered, or turned styles.
- Create custom newels and column wraps to meet your design requirements or for historic restoration.
- INTEX Newels and Column Wraps can be applied around existing structural members or used in stand-alone, non-structural applications, delivering everything needed for a quick, easy and secure installation.
- INTEX Newel and Column Wraps are compatible with INTEX Rail Systems
- Extruded INTEX Newels are available at 5"
- Split pedestal base options available for newels and column wraps: plain, 4-side, in-line, corner and 3-side. Column wraps are available in standard 6, 8, 10 and 12-inch widths and 8, 9, 10 and 12-foot heights complete with mounting brackets, caps, base trim, PVC adhesive and everything needed to finish installation.
- Make 4 x 4 posts look like 10" x 10" columns, or use column wraps to accent or match other trim components.
- INTEX Newels and Column Wraps can be painted, allowing for limitless design possibilities.
- Column Wraps ship in halves with Velcro and adhesives for easy installation
- INTEX Column Wraps are non-structural components

Newel POST WRAPS

Several newel posts wraps are also available in corner "C", in-line "L" and three-side "E" panel configurations. INTEX Newels are made from quality 5/8" thick PVC, and are designed for use with all INTEX Rail Systems. Larger standard & custom sizing and applications are also available.

40" Newels are for use with 36" Rail
 46" Newels are for use with 42" Rail
 50" Newels are for use at the bottom of stairs.

“ Easy Wrap is a very affordable post cover that can save many man hours of labor on site. It's plain easy to use design allows us to incorporate it on many applications such as basic porch post covers, outside shower post covers, landscaping screens, arbors, and gates. It gives us the ability to quickly cover the post and invest our time on the more intricate details of the elements that we are designing.

"We have done a few large projects with some leading rail brands and find that INTEX's product and design services are superior. We see the difference in the details. We value the hidden fasteners, the ease of customization and quick installation process for our rail projects. The finish product is always seamless and will never pull apart. To top it off, INTEX PVC products actually look like real wood."

Following the guidelines above will ensure a successful gutter installation and a lifetime of low maintenance performance. As with any gutter system it's important to clean debris from the gutter periodically to ensure proper drainage. Failure to keep debris from the gutter could result in damage due to water from ice and snow buildup.

(1) The Boston Gutter System should only be painted a color with a LRV (Light Reflective Value) greater than 55.

Mouldings & Trim

BY INTEX MILLWORK SOLUTIONS

INTEX fabricates mouldings from solid, cellular PVC boards using the same techniques as mills providing wood mouldings. INTEX moulding will not rot, absorb moisture, shrink or warp. Mouldings are milled to standard industry patterns. Additionally, mouldings are profile sanded, primed and ready for installation. Most profiles are shipped in lengths of 17'-6".

Custom milling is always available to match existing profiles, or to satisfy any design specification required.

INSIDE CORNERS

OUTSIDE CORNERS

In addition to standard and custom molded PVC profiles, INTEX Millwork Solutions can provide a large variety of siding, trim and accessories.

Custom Millwork

Traditionally renovating a historic home used to be challenging due to custom woodworking which would rot with time. Brackets, panels, trellis, porch heads or anything that can be imagined can be created to exact specifications.

INTEX Millwork Solutions specializes in the design and fabrication of custom cellular PVC trim and millwork. Architects and builders rely on INTEX's strengths in both traditional workmanship and engineering technology to craft intricately detailed, high-quality millwork for distinctive homes and buildings.

INTEX enables limitless interior and exterior custom millwork design options. From intricate details to innovative finishing touches, INTEX PVC custom millwork is created using advanced CAD design technologies, state-of-the-art fabrication equipment and hand-crafted techniques once reserved only for wood.

- Our custom millwork is produced to precise design specifications, fabricated to order, packaged securely so that product arrives damage free – ready for installation.
- Custom replication of brackets and other architectural details allow for a more accurate restoration.
- Custom lattice and panels provide a stylish sense of security.
- Add style and privacy with custom fencing.
- Custom railings and balusters per architect specs give a unique, elegant look.

Commercial Applications

You can count on the unsurpassed performance of INTEX's engineered systems. Innovative technology and fine craftsmen give INTEX the ability to meet any design specification. The easy to install INTEX "system" approach will also lower your construction labor costs.

- Liberty, Hampton, and Dartmouth Railing Systems are tested and carry a CCRR certification
- The engineered Premium Pergola System has longer clear spans when compared to the competition.
- Column Wraps can be installed at the end of construction.
- INTEX products can be customized to meet any design specification.
- INTEX's engineered products Meet International Building Code.
- Easy installation provides lower labor costs.
- All INTEX products are made from low maintenance 100% Cellular PVC.
- A full support design team is available to assist you with your project.

Historic Restorations

The experienced skilled craftsmen at INTEX have the knowledge and creativity to protect and preserve your home's architectural heritage. By using INTEX's talent and innovative technology, intricate ornamental detailing and exquisite finishing touches can be readily created.

- Millwork at INTEX is built by fine craftsmen.
- INTEX has the ability to match the details and craftsmanship of the original historic millwork
- Cellular PVC is durable, non-corrosive, rot and fungus resistant.
- INTEX's millwork is low maintenance and designed for long term performance and cost savings.

“

INTEX's ability to accurately recreate corbels using material that will ensure our homeowners experience years of worry free maintenance was instrumental in allowing us to fulfill the desire to maintain the architectural integrity of the community. It also went a long way toward helping us make good on our mission of providing low-cost, affordable and easy to maintain homes.

Habitat for Humanity of New Castle County*

Architectural Training

INTEX offers design services to architects that are unparalleled by providing a library of ready to use templates and custom templates upon request for project plans free of charge. No matter the design you have in mind, INTEX can help you bring it to life. Our advanced CAD design technologies, state of the art fabrication equipment and skilled craftsmen are available to create the finishing touch that stands the test of time.

INTEX Millwork Solutions recognizes the importance of continuing education in architecture and is very proud to proud to offer two AIA/Continuing Education System courses.

Course: Understanding the Benefits of Cellular PVC Rails, Pergolas and Gutters
Provider: INTEX Millwork Solutions
Length: 1 Hour
Credits: 1 LU
Code: INTEX20150126

Course Description:
This course will offer a basic understanding of the benefits of specifying cellular PVC (Poly Vinyl Chloride) railing systems, pergolas and gutters for residential construction projects. These systems in residential and commercial construction and remodeling are both decorative and functional however options have been historically limited to architects. Traditional materials like wood, vinyl, and composite materials have been the standard choices available for years, but these materials pose several challenges in aesthetics, durability, affordability, and limited design options. Today these systems can be created using cellular PVC which offers many advantages over traditional materials.

Course: Hand Rail Code Requirements and Design Considerations
Provider: INTEX Millwork Solutions
Length: 1 Hour
Credits: 1 LU (HSW)
Code: INTEX2017HSW

Course Description:
This course will provide the Architect with the details of railing systems code requirements and testing to ensure they meet IRC and IBC Building Codes. Integrating design elements based on materials and span limits into the structure architecture.

Common Questions

What are the benefits of Cellular PVC?
INTEX's Cellular PVC millwork offers durability that far surpasses wood or other materials. While wood can be affected by moisture, changing temperatures, UV light and insects, INTEX's Cellular PVC is just the opposite. Our Cellular PVC is impenetrable to moisture and it won't rot, swell or split like wood. INTEX's Cellular PVC is bug proof, UV resistant and impervious to salt. Unlike Vinyl, INTEX's Cellular PVC can be milled, painted, and installed like natural lumber. INTEX's Cellular PVC also does not squeak, shine, yellow, fade, or chalk like vinyl.

Can INTEX products be painted?
Yes, due to the inherent expansion and contraction characteristics of PVC, INTEX's PVC millwork products should only be painted colors with an LRV (light reflective value) greater than 55.

How do you clean Cellular PVC?
Cleaning all INTEX products are easy and fast with most major household cleaners. There are many cleaners on the market and the glass cleaners seem to be the best candidate for keeping the finish looking great. The cleaning solution should be applied and immediately wiped dry. Harsh cleaners with glycol ethers or ethanol type solvents and/or isopropyl alcohol are not recommended.

How long do INTEX products last?
INTEX products are designed to last in the harshest of environments. For this reason, all INTEX Millwork Solutions products carry a lifetime limited warranty.

Where can I purchase INTEX products?
Go to www.intexmillwork.com to find an authorized dealer near you.

Are technical drawings and documentation of INTEX products available?
Technical drawings and product documentation are available on www.intexmillwork.com. If you need more information, please call our office at (856) 293-4100.

Lifetime Limited Warranty

All INTEX Millwork Solutions products carry a lifetime limited warranty. Please see our web site for further information.
